Evolution vs. Intelligent Design
Student Organizer 2

Directions: Use the questions below as you complete your survey for Activity 1 - Survey Says!

1. Do you feel at all affected by this argument?

2. What do you know about the debate between evolution vs. intelligent design? Are you familiar with it at all?

3. Do you think it's appropriate to discuss intelligent design in public schools? Would it bother you if it were taught?

4. Do you think it's an appropriate discussion for science classes, or should it be discussed only in philosophy or religion courses?

5. What are your religious beliefs about evolution? How do your religious beliefs affect your idea of how life developed on Earth?

6. Would you be offended by discussions of intelligent design in school? Are you offended by discussion of evolution? Are your religious beliefs compatible with either theory?

7. Do you think it's important to be sensitive to the religious beliefs of others in public schools? If a particular discussion might offend certain students, is it best to avoid the subject entirely?

8. Do you think discussions of intelligent design would create conflict among different students? Why or why not?

9. Do you think certain parents would be upset to learn that intelligent design was being taught in public schools? Do you think certain parents would be upset by discussions of evolution? Should their feelings influence the lessons teachers choose to teach their students?

10. In your opinion, is there a solution to this debate? What is it?
